Software Development Technician Ene - Dic - 2026
Campuslads, Floridablanca

Bachiller 2025
Intituto Promocion Social (IPS)
Piedecuesta

EXPERIENCE

Clothing E-commerce Web Application

Campuslands

Developed a clothing e-commerce web application using HTML and CSS. Features a responsive product catalog and an intuitive interface designed to enhance the user browsing experience.

Community Tool Lending System

Campuslands

Developed a Python application to manage community tool lending. It allows users to register tools and members, as well as manage borrowing and returns while applying programming logic and data management concepts.

DeliveryBot - Internal Cafeteria Order Management

Campuslands

DeliveryBot is an automation solution built with n8n that transforms Telegram into an intelligent order management platform for institutional environments such as offices, universities, and large workplaces.
