Piedecuesta / Bucaramanga, Santander, Colombia (Remote / On-site)

TECHNICAL SKILLS

Languages:
Java (21), Python (3.11+), SQL.

Backend:
Spring Boot, FastAPI, Maven, JDBC, Hibernate / JPA, RESTful APIs.

Databases:
PostgreSQL, MySQL, structured JSON local persistence.

Architecture & Patterns:
Hexagonal Architecture (Ports and Adapters), Domain-Driven Design (DDD), SOLID Principles, Multithreading & Concurrency, Design Patterns (Observer, Strategy, Factory, Singleton).

DevOps & Infrastructure:
Docker, Docker Compose, Linux, Bash.

Tools & AI:
Git, GitHub, LangChain, Pydantic, LLM Integration, n8n.

Work Methodologies:
Scrum, Agile methodologies, Git Flow, Conventional Commits.

SAMUEL DAVID GELVEZ RODRÍGUEZ

JUNIOR BACKEND DEVELOPER

Java · Spring Boot · Python · FastAPI · PostgreSQL · Docker · Hexagonal Architecture

ABOUT ME

Junior Backend Developer trained through the high-performance program at Campuslands. Strong technical foundation in software engineering, decoupled modular backend architectures using **Java (Spring Boot)** and **Python (FastAPI)**, and relational database design (**PostgreSQL, MySQL**) with structured persistence. Dedicated to code excellence through the rigorous application of **SOLID** principles, design patterns (**Hexagonal Architecture, Domain-Driven Design**), multithreaded concurrency, and environment reproducibility with **Docker** on **Linux** systems. Recognized for analytical problem-solving, methodical discipline, and assertive communication to collaborate effectively in agile Scrum engineering teams.

FEATURED PROJECTS

2026 CONSTRUCTION MACHINERY & EQUIPMENT RENTAL PLATFORM
Java 21 · Spring Boot · PostgreSQL · Docker · Maven · Hexagonal Architecture

- Architected using Hexagonal Architecture (Ports & Adapters) and DDD principles to ensure full business logic independence from frameworks and databases.
- Engineered transactional inventory modules, dynamic rate calculation, equipment damage settlement, and standardized Docker container deployment.

Repository: github.com/Samuelgelvez20/Plataforma-de-Renta-de-Herramientas-de-Construccion

2026 TRIBUNAL BIMMER — AI PERCEPTION & ANALYTICS SYSTEM
Python · FastAPI · Pydantic · LangChain · Docker · Pytest · SOLID Principles

- Implemented a high-performance RESTful API with FastAPI enforcing strict data contracts validated at runtime using Pydantic v2.
- Orchestrated analytical pipelines with LangChain for real-time semantic classification and perception analysis with LLMs, covered by an automated Pytest test suite.

Repository: github.com/Samuelgelvez20/Tribunal-Bimmer

2026 SICA — ENTERPRISE ACCESS CONTROL SYSTEM (ZONA ACME)
Java 21 · PostgreSQL · Docker · JDBC · Maven · Hexagonal Architecture

- Decoupled Java 21 architecture organized into Vertical Slices, managing perimeter security and access control for an enterprise complex with 30+ corporate tenants.
- Implemented key design patterns: Observer for real-time guard notifications, Strategy for visitor entry validation rules, and optimized JDBC persistence on Dockerized PostgreSQL.

EDUCATION

2026 SOFTWARE DEVELOPMENT TECHNICIAN — CAMPUSLANDS
December 2025 – November 2026 · Floridablanca, Santander, Colombia
High-performance immersive training in computational logic, enterprise backend (Java, Spring Boot, Python), relational databases, multithreading, and Scrum.

2025 HIGH SCHOOL DIPLOMA — INSTITUTO PROMOCIÓN SOCIAL (IPS)
Piedecuesta, Santander, Colombia · Graduated 2025

CORE COMPETENCIES

- Structured Problem Solving
- Critical & Analytical Thinking
- Assertive Communication
- Collaborative Teamwork (Git Flow / PRs)
- Adaptability & Continuous Learning
- Efficient Time Management

LANGUAGES

Spanish: Native **English:** B1 (Technical & Conversational)
